About This Content

The Class 390 is a modern classic, and you can experience the speed of this powerful tilting express train from the driver's seat in Train Simulator.

The Class 390 is one of the fastest electric multiple units operating in Britain. The set can reach 140 mph, whilst featuring tilting train technology to allow higher speeds around bends. At present, the Class 390 operates along the West Coast Main Line and is well-known to commuters and railfans alike for its sleek looks and high performance. In 2006 a Class 390 set a new speed record along the West Coast Main Line, completing the 401-mile trip from London to Glasgow in 3 hours and 55 minutes, and in usual operation the sets will run up to 125mph where track conditions allow. The Class 390 for Train Simulator recreates the smooth high performance well-known to drivers on the West Coast Main Line, and features a realistic tilting function which mimics the action of the real thing.

Tosin Abasi likes this-. Great puzzle game from Iphone-IpodTouch. Terrible game.. Enjoyable. I used to be able to spend so much time on 50c at the arcade bullet hell machines people would go agro...good times.

Use a controller for a much more controllable experience. Plus, joysticks were built for this kind of game.

With a PS3 controller, Triangle will be Enter/Fire, O changes rbit formation. Learn from there.. One of the reviews I read says that this is even better than the base game that it is based on (Two Worlds II). I've unfortunately played that game and it was a horrible experience, every second of it. It is god awful in every way and has some of the worst combat I've ever seen in a game, so saying that this is even better deserves a few laughs. The first couple levels were alright but then the desert level with scorpions spikes the difficulty from a 3/10 to a 10/10. I was doing everything I could, laying down the best guys and I had champion guards, necromancer and healers, and all fire mages, all fully upgraded including my main captain, spent about 40+ minutes on the level fighting upwards of 20 waves, and late in the level on a late wave a boss scorpion still got through and killed my captain despite me doing everything I could. I tried three other times doing things somewhat differently but still doing enough that it should have warranted a victory but still ♥♥♥♥ed me over on or right before the big scorpion. Horribly misplaced difficulty spikes are a hallmark of a lot of bad games. I will be God damned if I try it a fifth time and waste another 40+ minutes of my life on an ignorant game like this. You have no freedom in how you play either. A lot of bad tower defense games are like this. You have to play an exactly exact specifically specific way, placing the towers they want you to place, on the places they want you to place them, and upgrade and build them in the ideal time frame that they want. Tower defense games with no freedom like this one are some of the most boringly linear games there are.

Long story short I wasted over two hours of my life on this ♥♥♥♥ing dog♥♥♥♥♥♥♥♥garbage.

Sucks massive d1ck. Sucks so bad I want my 99 cents back lol. I, no joke, would rather have flushed that dollar down the toilet than buy this game had I have known it was this d-ck suckingly bad. Paying someone to drop a cinderblock on my leg from the top of my house would've even been money better spent than buying this ugly, soulless, nonsensical, waste of time.

This is the best Sonic game, and possibly the best 2D platformer, ever!. Its a wierd Pokemon Stadium/Tamagotchi/street fighter game.

At 7\$ its a niche game that tries to do soomething different, if nothing else I admire the dev for continuing to improve the game even with the uncanny monster design choices.

I reccomend it to anyone wanting to try something fairly different that is interested in monster fighting games.. Updated review: Overall opinion - I recommend this game. It is mostly fun.

This game has quite a few bugs in it, but none of them, from what I found, break saved games. A couple of them do require you to quit the game and reload it, but saved-games are intact.

The bugs are not exploitable, but they are humourous. I kinda hope the dev's leave them in the game.

The ending of the game is a big letdown IMHO. It's like a cliff hanger at the end of a TV series season. Either the dev's intend to add more gameplay with an update, or they're going to release either DLC or a Deiland 2 to complete the story.

The keyboard controls take some getting used to, but once you've got them under control (pun intended), the game is easy to play.

Old review:

Liking this game quite a lot. Will probably update this review at a later date after I've "finished" the game, but so far, very good.. where is the opera house , sydney harbour bridge..... One hit kills + copy pasted enemies that spawn behind you make for a not fun time.

Maybe some day in the future, this game will be better.
